MEMORANDUM ON INTERNAL CONTROL

To the Board of Directors
Stanislaus Regional Water Authority
Turlock, California

In planning and performing our audit of the basic financial statements of the Stanislaus Regional Water Authority (the Authority) as of and for the year ended June 30, 2020, in accordance with auditing standards generally accepted in the United States of America, we considered the Authority's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Authority's internal control. Accordingly, we do not express an opinion on the effectiveness of the Authority's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore material weaknesses or significant deficiencies may exist that were not identified. In addition, because of inherent limitations in internal control, including the possibility of management override of controls, misstatements due to error or fraud may occur and not be detected by such controls. However, as discussed below, we identified certain deficiencies in internal control that we consider to be significant deficiencies.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the Authority's financial statements will not be prevented, or detected and corrected on a timely basis. We did not identify any deficiencies in internal control that we consider to be material weaknesses.

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiencies in internal control included on the Schedule of Significant Deficiencies to be significant deficiencies.

Included in the Schedule of Other Matters are recommendations not meeting the above definitions that we believe are opportunities for strengthening internal controls and operating efficiency.

Management's written responses included in this report have not been subjected to the audit procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

This communication is intended solely for the information and use of management, the Authority Board, others within the organization, and agencies and pass-through entities requiring compliance with *Government Auditing Standards*, and is not intended to be and should not be used by anyone other than these specified parties.

MEMORANDUM ON INTERNAL CONTROL

SCHEDULE OF SIGNIFICANT DEFICIENCIES

During our audit of the financial statements of the City of Turlock (City) for the year ended June 30, 2020 the following items were identified as significant deficiencies. Since the Authority utilizes the City to provide the Authority's accounting function, we consider the following to be significant deficiencies in the Authority's internal control.

2020-001 Segregation of Duties for Changes to the Vendor Database

The functions of payment processing and vendor database maintenance should be segregated.

During our review of the Accounts Payable process, we noted that two staff members who have the ability to process disbursements can also make changes to the vendor database without approval.

Although the City's accounting system can produce a Vendor Change Report that shows what changes have been made to the vendor database, there are currently no procedures in place for this report to be reviewed by an employee that cannot make changes to the vendor database.

If changes to the vendor database are not reviewed and approved, errors or unauthorized changes may go undetected.

The City should implement procedures to include a review of the report by an employee that is not able to make changes to the vendor database to ensure unauthorized changes to the database are not made.

Management's Response:

The Senior Accountant who oversees Accounts Payable reviewed New World security to determine the rights of individual users in the Purchasing and Accounts Payable processes. It was noted the Purchasing Coordinator does not have access to pay invoices or post Accounts Payable. She does, however, have access to vendor approvals along with the Senior Accountant. The process from vendor set-up to payment of invoices does have many layers of segregation of duties and cross checking of functions which would make inappropriate vendor payments highly unlikely. The process is initiated at the department level with request for a vendor, which is routed to Purchasing, who is then responsible to setup the new vendor. Purchase Orders are input by each respective department and routed to purchasing with appropriate backup from the Departments for approval. Accounts Payable, which is a separate department and function from purchasing, processes the payment requests initiated at the department level and approved by a department manager. Accounting is responsible to verify payment requests comply with purchase orders and vendor information matches the purchase order and invoice(s). The segregation of duties between Purchasing and Accounts Payable provides assurance that vendor invoices are appropriately approved and paid.

SCHEDULE OF OTHER MATTERS

NEW GASB PRONOUNCEMENTS OR PRONOUNCEMENTS NOT YET EFFECTIVE

The following comment represents new pronouncements taking affect in the next few years. We cite them here to keep you informed of developments:

EFFECTIVE FISCAL YEAR 2020/21:

GASB 84 – *Fiduciary Activities*

The objective of this Statement is to improve guidance regarding the identification of fiduciary activities for accounting and financial reporting purposes and how those activities should be reported.

This Statement establishes criteria for identifying fiduciary activities of all state and local governments. The focus of the criteria generally is on (1) whether a government is controlling the assets of the fiduciary activity and (2) the beneficiaries with whom a fiduciary relationship exists. Separate criteria are included to identify fiduciary component units and postemployment benefit arrangements that are fiduciary activities.

GASB 90 – *Majority Equity Interests—an amendment of GASB Statements No. 14 and No. 61*

The primary objectives of this Statement are to improve the consistency and comparability of reporting a government's majority equity interest in a legally separate organization and to improve the relevance of financial statement information for certain component units. It defines a majority equity interest and specifies that a majority equity interest in a legally separate organization should be reported as an investment if a government's holding of the equity interest meets the definition of an investment. A majority equity interest that meets the definition of an investment should be measured using the equity method, unless it is held by a special-purpose government engaged only in fiduciary activities, a fiduciary fund, or an endowment (including permanent and term endowments) or permanent fund. Those governments and funds should measure the majority equity interest at fair value.

EFFECTIVE FISCAL YEAR 2021/22:

GASB 87 – *Leases*

The objective of this Statement is to better meet the information needs of financial statement users by improving accounting and financial reporting for leases by governments. This Statement increases the usefulness of governments' financial statements by requiring recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. Under this Statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources, thereby enhancing the relevance and consistency of information about governments' leasing activities.

MEMORANDUM ON INTERNAL CONTROL

SCHEDULE OF OTHER MATTERS

GASB 89 – Accounting for Interest Cost Incurred before the End of a Construction Period

The objectives of this Statement are (1) to enhance the relevance and comparability of information about capital assets and the cost of borrowing for a reporting period and (2) to simplify accounting for interest cost incurred before the end of a construction period.

This Statement establishes accounting requirements for interest cost incurred before the end of a construction period. Such interest cost includes all interest that previously was accounted for in accordance with the requirements of paragraphs 5–22 of Statement No. 62, *Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements*, which are superseded by this Statement. This Statement requires that interest cost incurred before the end of a construction period be recognized as an expense in the period in which the cost is incurred for financial statements prepared using the economic resources measurement focus. As a result, interest cost incurred before the end of a construction period will not be included in the historical cost of a capital asset reported in a business-type activity or enterprise fund.

This Statement also reiterates that in financial statements prepared using the current financial resources measurement focus, interest cost incurred before the end of a construction period should be recognized as an expenditure on a basis consistent with governmental fund accounting principles.

GASB 92 – Omnibus 2020

The objectives of this Statement are to enhance comparability in accounting and financial reporting and to improve the consistency of authoritative literature by addressing practice issues that have been identified during implementation and application of certain GASB Statements.

GASB 93 – Replacement of Interbank Offered Rates

Some governments have entered into agreements in which variable payments made or received depend on an interbank offered rate (IBOR)—most notably, the London Interbank Offered Rate (LIBOR). As a result of global reference rate reform, LIBOR is expected to cease to exist in its current form at the end of 2021, prompting governments to amend or replace financial instruments for the purpose of replacing LIBOR with other reference rates, by either changing the reference rate or adding or changing fallback provisions related to the reference rate.

Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*, as amended, requires a government to terminate hedge accounting when it renegotiates or amends a critical term of a hedging derivative instrument, such as the reference rate of a hedging derivative instrument's variable payment. In addition, in accordance with Statement No. 87, *Leases*, as amended, replacement of the rate on which variable payments depend in a lease contract would require a government to apply the provisions for lease modifications, including remeasurement of the lease liability or lease receivable.

The objective of this Statement is to address those and other accounting and financial reporting implications that result from the replacement of an IBOR.

MEMORANDUM ON INTERNAL CONTROL

SCHEDULE OF OTHER MATTERS

GASB 97 – Certain Component Unit Criteria, and Accounting for and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans

The primary objectives of this Statement are to (1) increase consistency and comparability related to the reporting of fiduciary component units in circumstances in which a potential component unit does not have a governing board and the primary government performs the duties that a governing board typically would perform; (2) mitigate costs associated with the reporting of certain defined contribution pension plans, defined contribution other postemployment benefit (OPEB) plans, and employee benefit plans other than pension plans or OPEB plans (other employee benefit plans) as fiduciary component units in fiduciary fund financial statements; and (3) enhance the relevance, consistency, and comparability of the accounting and financial reporting for Internal Revenue Code (IRC) Section 457 deferred compensation plans (Section 457 plans) that meet the definition of a pension plan and for benefits provided through those plans.

EFFECTIVE FISCAL YEAR 2022/23:

GASB 91 – Conduit Debt Obligations

The primary objectives of this Statement are to provide a single method of reporting conduit debt obligations by issuers and eliminate diversity in practice associated with (1) commitments extended by issuers, (2) arrangements associated with conduit debt obligations, and (3) related note disclosures. This Statement achieves those objectives by clarifying the existing definition of a conduit debt obligation; establishing that a conduit debt obligation is not a liability of the issuer; establishing standards for accounting and financial reporting of additional commitments and voluntary commitments extended by issuers and arrangements associated with conduit debt obligations; and improving required note disclosures.

GASB 94 – Public-Private and Public-Public Partnerships and Availability Payment Arrangements

The primary objective of this Statement is to improve financial reporting by addressing issues related to public-private and public-public partnership arrangements (PPPs). As used in this Statement, a PPP is an arrangement in which a government (the transferor) contracts with an operator (a governmental or nongovernmental entity) to provide public services by conveying control of the right to operate or use a nonfinancial asset, such as infrastructure or other capital asset (the underlying PPP asset), for a period of time in an exchange or exchange-like transaction. Some PPPs meet the definition of a service concession arrangement (SCA), which the Board defines in this Statement as a PPP in which (1) the operator collects and is compensated by fees from third parties; (2) the transferor determines or has the ability to modify or approve which services the operator is required to provide, to whom the operator is required to provide the services, and the prices or rates that can be charged for the services; and (3) the transferor is entitled to significant residual interest in the service utility of the underlying PPP asset at the end of the arrangement.

This Statement also provides guidance for accounting and financial reporting for availability payment arrangements (APAs). As defined in this Statement, an APA is an arrangement in which a government compensates an operator for services that may include designing, constructing, financing, maintaining, or operating an underlying nonfinancial asset for a period of time in an exchange or exchange-like transaction.

MEMORANDUM ON INTERNAL CONTROL

SCHEDULE OF OTHER MATTERS

GASB 96 – Subscription-Based Information Technology Arrangements

This Statement provides guidance on the accounting and financial reporting for subscription-based information technology arrangements (SBITAs) for government end users (governments). This Statement (1) defines a SBITA; (2) establishes that a SBITA results in a right-to-use subscription asset—an intangible asset—and a corresponding subscription liability; (3) provides the capitalization criteria for outlays other than subscription payments, including implementation costs of a SBITA; and (4) requires note disclosures regarding a SBITA. To the extent relevant, the standards for SBITAs are based on the standards established in Statement No. 87, Leases, as amended.

MEMORANDUM ON INTERNAL CONTROL

**STATUS OF PRIOR YEAR
SCHEDULE OF OTHER MATTERS**

2016-01 Insurance/Bonds Provisions of the Joint Exercise of Powers Agreement

Article XIV, Insurance/Bonds, of the Authority’s amended Joint Exercise of Powers Agreement includes the provision that the Authority “shall at all times maintain worker’s compensation insurance and insurance against public liability and property damage to the extent reasonably necessary...Such insurance may be maintained in whole or in part in the form of self-insurance.” And, Article XX, Participant Employees, indicates that “Each Participant shall assume all liability related to its employees who provide services in connection with this Agreement...However, the Authority may, in its sole discretion, procure a policy or policies of insurance in the types and amounts it deems appropriate. In the event such policy or policies of insurance are procured by the Authority, such insurance coverage shall be primary over any obligation of the Participant under this section.”

The Authority has not obtained worker’s compensation, liability or property damage insurance policies to date or documented the manner in which it is self-insured.

The Authority should review the need for insurance coverage as contemplated by Articles XIV and XX of the Agreement and formally document what policies are in place, not in place, or in what manner the Authority is self-insured.

Current Status: Implemented.
